Query terms are searched for in an **As Is** manner; that is, they will **not** undergo any language related **transformation** or query **expansion** and Muteferriqa will **only** look for literal matches in its database.

کتاب matches کتاب , kitap matches kitap, book matches book and nothing else.

A **query term** must contain at least **three** characters (excluding *special characters*) in order to be included in the *search*, i.e.,

اشبه صفحه ده افدک زوقم دکر صورت
رسم اولنوب دایراما دارسوا حلدن واقع
مالک عدیل و بلاد مشهورن دخی حلیله
